📁 slothdemon451.github.io

Summary

Full-stack engineer with four years of shipping web, mobile, and desktop products end to end for clients in Spain, the UK, and the US. Delivered 30+ projects including an offline-first restaurant POS suite with online ordering and driver apps, three apps on the App Store and Google Play, and B2B e-commerce platforms with Spanish payment and logistics integrations. Comfortable owning the whole stack: architecture, React and Next.js front ends, Node and Python services, PostgreSQL and MongoDB, mobile releases, and the servers and CI/CD they run on. Known for replacing expensive SaaS with self-hosted solutions, such as cutting a client's email bill by 95% and removing per-message fees from their customer messaging.

Education

Institute of Space Technology, KICSIT Campus

Sep 2020 – Sep 2024

Bachelor of Science in Computer Science

Islamabad, Pakistan

- **Relevant Coursework:** Data Structures and Algorithms (C++), Probability and Statistics in CS (Python), Linear Algebra with Computational Applications (Python), Artificial Intelligence, Machine Learning, Web Development

Experience

Independent Contractor

Jan 2022 – Present

Full Stack & Solutions Engineer

Remote

- Built and maintain web, mobile, and desktop products for Spanish and UK businesses including Brothers Mart, Ali Doner Kebab, Nariza, Best Chef, Chand, Ascent Immigration, and Femme Brazen, from first call to production and ongoing support.
- Engineered an offline-first Electron POS suite with kitchen display, thermal printer routing, online ordering, and driver dispatch, plus retail POS extensions with credit ledgers, automated deductions, and multi-jurisdiction tax.
- Run the infrastructure behind client products: VPS deployments with CI/CD, self-hosted mail (mailcow with SPF, DKIM, DMARC, and a relay IP) that cut one client's email cost by 95%, and a self-hosted WhatsApp bridge that sends receipts and account updates from the POS with no per-message fee.

CarFig

Nov 2025 – Jun 2026

Full Stack Developer, Full Time

Remote

- Owned the automotive marketplace end to end: consumer site, dealer admin panel, and REST API, from architecture through production deployment at carfig.com.
- Shipped the iOS and Android apps independently with React Native and Expo, handling native integrations, store submissions, and release cycles; both are live on the App Store and Google Play.
- Ran CI/CD for all applications with GitHub Actions on a self-hosted VPS behind Cloudflare, covering build automation, environment configuration, and deployments.

ZySoftec

Apr 2025 – Nov 2025

Full Stack Developer, Full Time

Remote

- Developed and maintained client applications with React, Next.js, FastAPI, Node.js, and PHP, including a real estate platform with 500,000+ agent profiles, a warehouse management system, and an e-commerce platform with a custom payment SDK.
- Built custom WordPress themes and plugins with CRM integrations, and motion-heavy marketing sites with GSAP and Framer Motion.

BuildSpace

Jun 2024 – Jul 2024

Cohort Developer

Remote

- Built and shipped Documentrio, an AI documentary generator with credit-based Stripe subscriptions, presenting weekly demos and taking part in code reviews across the cohort.

Omni Academy

Mar 2023 – Mar 2024

Blockchain Trainer

Remote

- Led the blockchain curriculum: online courses, hands-on workshops, live smart contract labs, and consultations for students and small teams.

- ThunderJaw POS Suite** | *Electron, React, TypeScript, PostgreSQL, Next.js, Expo* Freelance
- **Offline-First POS:** Electron desktop app on a local database with an IPC bridge, a 15-second sync queue with retry, kitchen display screen, and per-product ESC/POS printer routing for kitchen, bar, and grill tickets.
 - **Order Pipeline:** Web and app orders reach the POS within 10 seconds and every status change syncs back, so customers watch pending, in kitchen, ready, and out for delivery update live.
 - **Four Clients, One API:** Next.js ordering site with polygon delivery zones on Google Maps, Expo customer and driver apps with GPS dispatch and push notifications, and a Next.js admin panel. Spanish and English throughout. Live for Ali Doner Kebab at alikebabrivas.es.
- CarFig** | *Next.js, Node.js, React Native, Expo, Cloudflare, GitHub Actions* CarFig
- Owned the automotive marketplace, dealer admin panel, and REST API from architecture to production at carfig.com. Shipped the iOS and Android apps independently, now on the App Store and Google Play, with camera-based listing uploads and push notifications for price drops and buyer enquiries.
 - Ran CI/CD for all applications with GitHub Actions on a self-hosted VPS behind Cloudflare, covering build automation, environment configuration, and zero-downtime deploys.
- Brothers Mart** | *Next.js, Express, MongoDB, Redsys, MRW API, Expo* Freelance
- Built the bilingual B2B packaging storefront at mart.b-brothers.es, a 14-screen admin CMS (multi-step product builder, localised banners, display products, fulfilment dashboard, store metrics), and a wholesale ordering app on the App Store, all on one REST API.
 - Integrated Redsys Virtual POS with 3D Secure and Bizum, MRW shipping over SOAP for rates, labels, and tracking, PDF invoices via Puppeteer, and a cart with VAT and automatic shipping calculation.
- ALS — Agent Listing Service** | *Next.js, Node.js, MongoDB, WebSockets, JWT* ZySofttec
- Led front-end and back-end development of a real estate platform hosting 500,000+ verified agent profiles with sub-second search, property listings, referrals, payment plans, profile claiming, real-time messaging, contract sharing, and auto-generated Crib Flyer microsites, with multi-tier admin control.
- Nariza** | *Next.js, TypeScript, Tailwind CSS, Framer Motion, Nodemailer* Freelance
- Designed and built the premium beverage brand site at nariza.b-brothers.es: a Framer Motion flavour showcase, brand timeline, distributed-brands wall, filterable wholesale catalog, and a quote form that emails the sales team. Delivered sister sites for Best Chef and Chand on the same stack.
- Noor Boutique** | *Next.js, Redux, Node.js, Express, Socket.IO, MongoDB* ZySofttec
- Led development of an e-commerce platform with admin, customer, and driver panels and real-time order tracking over Socket.IO. Converted the Plutu PHP payment gateway into a reusable JavaScript SDK with Libyan payment methods, multi-currency flows, and signed transaction callbacks.
- Web-Based Retail POS** | *CodeIgniter (PHP), MySQL, jQuery, Puppeteer, Docker* Freelance
- Extended a retail POS with customer credit ledgers and automated deductions, driver dispatch, multi-jurisdiction tax, and advanced reporting. Added a self-hosted WhatsApp bridge that sends receipts, invoices, and account balance updates at checkout with no per-message fee, replacing a paid SMS and WhatsApp API quote.
- MySportia** | *WordPress, PHP, Custom Theme, Custom Plugin, Monday.com API, GraphQL* ZySofttec
- Built a sports training platform on WordPress from scratch: a custom theme, a custom admin dashboard inside wp-admin, and a bespoke plugin handling multi-step user onboarding. Integrated Monday.com as the CRM over its GraphQL API so every sign-up and booking creates and updates board items automatically, replacing manual data entry for the client's sales team.
- Femme Brazen** | *Shopify, Liquid, JavaScript, CSS* Freelance
- Customised the lingerie and nightwear storefront at femmebrazen.com with custom Liquid sections, a three-slide promotional hero, collection highlights, sidebar filters, an express checkout product page, a slide-out mini cart with upsells, and a recently viewed strip.
- Documentrio** | *Next.js, Python, GPT-4, Eleven Labs, AWS S3, Stripe* BuildSpace
- Subscription SaaS that turns a prompt into a narrated documentary: GPT-4 scripts it, Eleven Labs voices it, Python workers render it to S3, and credit-based plans are metered and billed through Stripe. Creator dashboard with prompt presets, a render gallery, and monthly credit usage charts.

Technical Skills

Languages: JavaScript, TypeScript, Python, PHP, SQL, C/C++, HTML, CSS
Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, Shadcn UI, Material UI, Framer Motion, GSAP
Mobile & Desktop: React Native, Expo, Electron
Backend: Node.js, Express, FastAPI, Laravel, CodeIgniter, REST APIs, WebSockets, JWT
Data: PostgreSQL, MySQL, MongoDB, Redis, Knex
Infrastructure: Docker, Linux, VPS administration, GitHub Actions, Cloudflare, AWS S3, Google Cloud, mailcow
Integrations: Stripe, PayPal, Redsys and Bizum, MRW shipping, WhatsApp Web, Google Maps, Nodemailer, Puppeteer
CMS & Commerce: WordPress, Elementor, Shopify and Liquid, Webflow
AI: OpenAI GPT-4, Eleven Labs, LangGraph, Vertex AI
Languages Spoken: English (professional), Urdu, Hindi

Certifications

Blockchain Specialization: Dapps, Platforms, Smart Contracts (Coursera)
HTML5 Specialization: University of Michigan (Coursera)
FreeCodeCamp: JavaScript Algorithms and Data Structures, Responsive Web Design, Front End Development Libraries, Back End Development and APIs
Graphic Design: First prize, KTECH university competition
