

Muhammad Usman Imran

Full-Stack Software Engineer Independent Contractor

📞 +92 3181522158 ✉ usmanimran158@gmail.com 🔗 [linkedin.com/in/usman-imran](https://www.linkedin.com/in/usman-imran) 🖥 <https://veaxiz.vercel.app/>

Summary

Dynamic Full-Stack Software Engineer with extensive expertise in building high-performance, user-centric web, mobile, and desktop applications using React, Next.js, React Native, Node.js, and modern database architectures. Proven track record in designing robust, local-first system architectures, managing complex technical lifecycles, and collaborating remotely with international clients and companies. Experienced in operational leadership for tech solutions, combining deep technical execution with team recruitment, international project deployment, and cross-functional leadership. Skilled at breaking down complex logic, optimizing hardware-level performance, and delivering clean, scalable, production-ready code.

Education

KICSIT Sub Campus Institute of Space Technology
Bachelor of Science in Computer Science

Sep 2020 - Sep 2024
Islamabad, Pakistan

- **Relevant Coursework:** Data Structures and Algorithms (C++), Prob & Stat in CS (Python), Intro to Web-Dev, AI, ML, Linear Algebra w/Computational Applications (Python)

Experience

Freelancing

Jan 2022 - Present

Full Stack & Solutions Engineer

Remote

- Delivered tailored full-stack, mobile, and desktop applications for prominent brands and businesses, including B.Brothers, Chand, Best Chef, Ascent Immigration, Ali Doner Kebab, Sehab Elegance etc.
- Engineered advanced commercial software solutions, including high-performance desktop POS systems, custom financing and ledger applications, and interactive self-service kiosk ordering systems for high-traffic food outlets.
- Architected robust e-commerce platforms, custom CMS architectures, and self-hosted cloud/server solutions, including secure corporate email infrastructure and unified messaging clients.

Carfig

Nov 2025 – June 2026

Full Time - Full Stack Developer

Remote

- Engineered and maintained a full-stack automotive marketplace platform across multiple apps consumer-facing website, admin dashboard, and REST API taking end-to-end ownership from architecture to deployment.
- Developed and shipped cross-platform mobile applications for iOS and Android using React Native, handling the full mobile development lifecycle independently.
- Managed and maintained CI/CD pipelines on a self-hosted VPS using GitHub Actions, overseeing build automation, deployment workflows, and environment configuration across multiple production applications.

ZySoftec

April 2025 – Nov 2025

Full Time - Full Stack Developer

Remote

- Develop and maintain full stack applications using React, Next.js, Fast API, PHP, Node.js, GSAP, and Framer Motion, while optimizing responsiveness, user experience, and performance across devices.
- Build and customize WordPress themes, develop custom plugins, and integrate APIs to deliver dynamic, scalable solutions in collaboration with cross-functional teams.

BuildSpace

Jun 2024 – Jul 2024

Cohort - Full Stack Developer

Remote

- Documentrio: Developed an AI platform that transforms user prompts into documentaries.
- Submitted weekly updates, feedback, code reviews, engage with community, and presented project demos.

Omni Academy

Mar 2023 – Mar 2024

Blockchain Trainer / Instructor

Remote

- Led all blockchain-related course training and instruction, multiple workshops, and provided field consultations.
- Conducted courses via online meetings, including live practical sessions for students.

- CarFig — Automotive Marketplace Platform** | *Next.js, Node.js, REST API, Tailwind CSS, React Native, Cloudflare* ZySoftec
- Engineered and maintained a full-stack automotive marketplace platform across a consumer web application, admin control panel, and RESTful APIs, taking end-to-end ownership from architecture to production deployment. Shipped cross-platform iOS and Android mobile applications using React Native, managing native feature integrations and full release lifecycles. Configured automated deployment workflows and CI/CD pipelines using GitHub Actions on self-hosted VPS environments
- ALI Doner Kebab — POS & Operational Suite** | *Electron.js, React.js, Tailwind CSS, PostgreSQL, React Native* FreeLance
- Offline-First POS & Sync:** Built an Electron/React desktop POS on local PostgreSQL with background cloud queues, managing cashier ordering, cash balances, and multi-station ESC/POS thermal printing.
 - Omnichannel Ordering Platform:** Developed a customer-facing Next.js web app and Expo React Native mobile app with polygon delivery zone checking and live order tracking.
 - Logistics & Fleet Dispatch:** Implemented a visual Delivery Radar in the POS with multi-stop route grouping and live driver GPS streaming via an Expo React Native driver app using background location services.
- ALS — Agent Listing Service** | *Next.js, React.js, Node.js, REST API, MongoDB, Sockets, JWT, Tailwind CSS* ZySoftec
- Built a full-scale real estate platform with 500,000+ verified agent profiles, supporting property listings, referrals, and lead management. Developed features for property uploads, payment plans, agent referrals, profile claiming, messaging, contract sharing, and auto generated Crib Flyer sites. Delivered secure, real-time experiences across agent and consumer panels with complete admin control, leading both front-end and back-end development.
- Noor Boutique — E-commerce Platform** | *Next.js, Redux, Node.js, Express.js, Socket.IO, MongoDB* ZySoftec
- Led development of a scalable e-commerce platform with dedicated panels for admins, customers, and drivers. Real-time order tracking and notifications built via Socket.IO and managed state using Redux for a dynamic UX. Also converted the Plutu PHP payment gateway into a reusable JavaScript SDK, adding support for Libyan payment methods, multi-currency flows, and secure transaction callbacks.
- Brothers Mart — E-Commerce & B2B Platform** | *Next.js, React Native, Redsys API, MRW API* Freelance
- Engineered a full-scale e-commerce ecosystem consisting of a web platform, cross-platform mobile applications, and a centralized CMS admin panel allowing complete dynamic control over site content (images, UI text, icons, and layout sections). Integrated Redsys Virtual POS (supporting 3D Secure 2.0 card processing and Bizum payments) alongside MRW shipping API endpoints for automated logistics, label generation, and dispatch tracking. Built specialized B2B wholesale bulk-ordering workflows tailored for restaurant and business owners, featuring multi-tiered pricing, bulk volume discounts, and order tracking.
- Undiscovered Hoops** | *React, Next.js, Node.js, WebSockets, Cloudinary, Stripe, TailWind CSS, Bootstrap* ZySoftec
- Built a full-stack sports platform connecting players, coaches, recruiters, and directors using the MERN stack and Socket.IO. Developed role-specific dashboards, live chat, social media embeds, and media/news management. Enhanced player ranking workflows and centralized admin operations for content and user control.
- Las Veggies** | *React, Next.js, Node.js, Firebase, TailWind CSS* FreeLance
- Developed a full-stack grocery delivery system with mobile ordering, inventory management, and real-time driver assignment via Google Maps. Built administration tools for tracking orders, managing stock, and overseeing delivery logistics.
- Warenwirtschaft** | *Next.js, React.js, Node.js, REST API, MongoDB, JWT, Tailwind CSS* ZySoftec
- Developed a full-stack warehouse management system for a German client using the MERN stack. Built dashboards to track incoming/outgoing goods, status updates, and visual weekly/monthly reports. Implemented user roles for warehouse staff to manage inventory and view analytics in a responsive, modern UI.
- POS** | *CodeIgnitor (PHP), MySQL, HTML, CSS, JS, Bootstrap* FreeLance
- Customized and extended an open-source point-of-sale system by adding modules for delivery drivers, whatsapp integration, file-manager, advanced reporting, customer credit with automated deductions, and enhanced tax functionalities to fit specific business workflows.
- Ascent Immigration** | *WordPress, Custom Sections/Templates, MySQL, PHP* FreeLance
- Delivered a custom WordPress solution for an immigration consultancy, featuring bespoke theme templates and a clean, modern UI. Focused on intuitive navigation, branded styling, and optimized performance to ensure a professional and trustworthy user experience throughout the site.
- MySportia** | *WordPress, Custom-theme, Custom-Plugin, MySQL, PHP, CRM Integration, GraphQL* ZySoftec
- Delivered a full custom WordPress solution for a sports training platform, including a personalized user onboarding plugin, bespoke theme templates, and integrated Monday.com CRM workflows. Built for scalability and automation, streamlining client acquisition and engagement across the platform.
- Sahab Elegance** | *Shopify, Liquid, Ruby on Rails, SEO, SMM* Freelance

- Developed an Street wear clothing store optimized code and added custom sections according to the clients need.

Documentrio | *MongoDB, React.js, TypeScript, Next.js, Python, Tailwind CSS, GPT 4, Eleven Labs, AWS S3, Stripe* FYP

- Developed an Subscription based AI platform that transforms user prompts into documentaries enhancing content creation efficiency and user engagement.

Mercy Group Real Estate | – *HTML, CSS, JavaScript, MySQL, PHP*

Freelance

- Developed and customized a real estate site, blogs, and service pages, converting pixel-perfect Figma designs into responsive web pages. Used HTML, CSS, JavaScript, and PHP to build dynamic interfaces with advanced search, interactive maps, mortgage calculators, contact forms, and an admin panel to manage CRUD operations and user management.

Technical Skills

Proficient in: HTML, Javascript, PHP, Python, TypeScript, C/C++, SQL, Docker, Linux, React.js, React Native, Next.js

Experienced With: React.js, Next.js, Electron.js, Express.js, jQuery, Wordpress, Shopify, Webflow, MongoDB, Firebase, PostgreSQL, Tailwind CSS, Bootstrap, MySQL, Laravel, Node.js, Express.js, Redux.js, Chakra UI, Shadcn UI, Acernity UI, Git, Stripe, Paypal, Redsys 3D API's, Meta Cloud API, Web Sockets, MRW API's Cloudinary, S3, AWS, Google Cloud, Vercel, Glitch, Netlify, Render, Heroku, Digital Ocean

Familiar With: Jupyter, Figma, MS Office 365, Google Collab, Canva

Knowledgeable In: Software Engineering, Agile Methodology, Database Management, Front & Back End Development

Demonstrated: Effective Communication, Teamwork, Problem-Solving, Adaptability

Languages Spoken: English (Professional / Fluent), Urdu / Hindi

Certifications

Blockchain Specialization – Dapps – Platforms – Smart Contracts (Coursera)

HTML5 Specialization: From the University of Michigan (Coursera)

Graphic Designing: Won First Prize at KTECH Event (University Competition)

Legacy Javascript Algorithms and Data Structures: (FreeCodeCamp)

Legacy Responsive Web Design: (FreeCodeCamp)

Front End Development Libraries: (FreeCodeCamp)

Back End Development and APIs: (FreeCodeCamp)
